Available with WISKA operating system

Tested at our state-of-the-art laboratory

Made in Germany

Excellent aftersales & service support

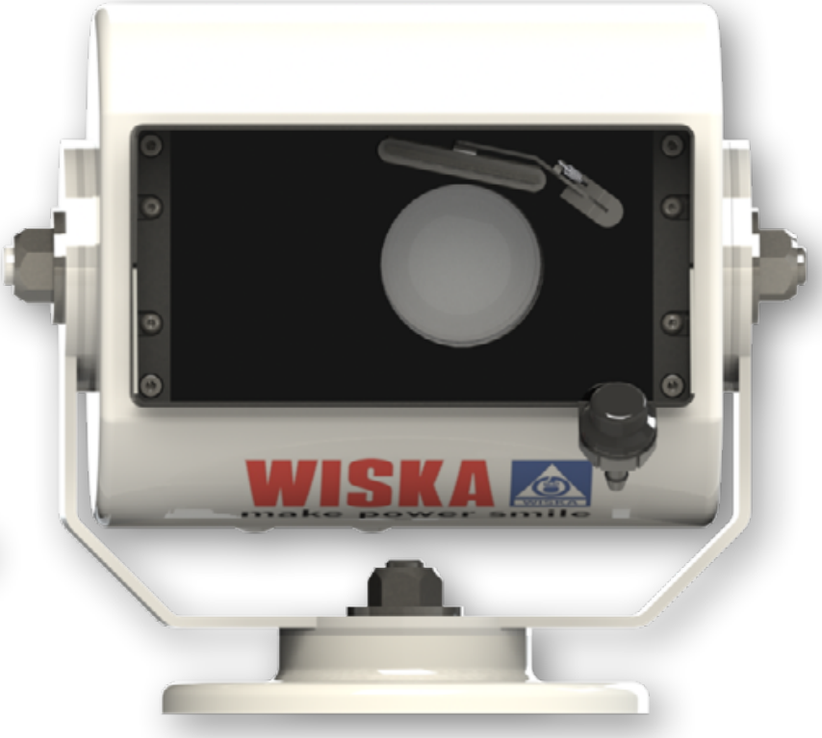
Skilled team on hand to support

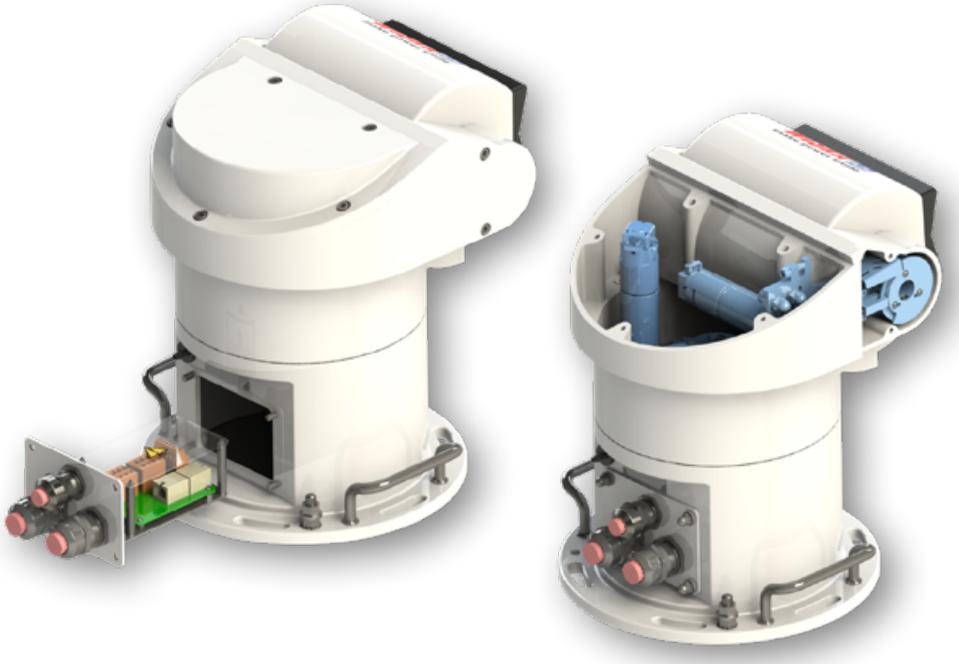
Over 100 years of maritime industry experience

Built for the demands of the rough seas

The CCTV Camera Series CS-S

For nearly twenty years, WISKA have been developing and building CCTV video systems for extreme environments. The CS-S series is the culmination of experience and expertise. A completely new design, updating both, the external features and internal components – to make the WISKA CCTV product range up to date.

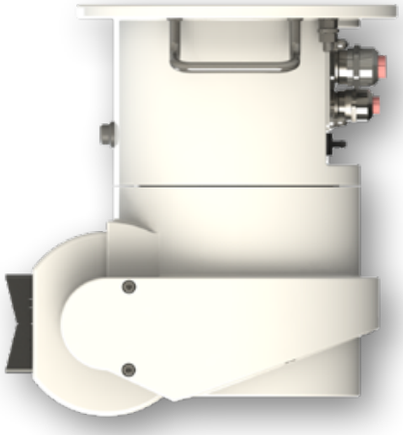




Updated design

Easy installation and no external cabling thanks to a new integrated connection area.

An improved drive technology provides precise positioning.
A reduced backlash withstands maritime vibrations.

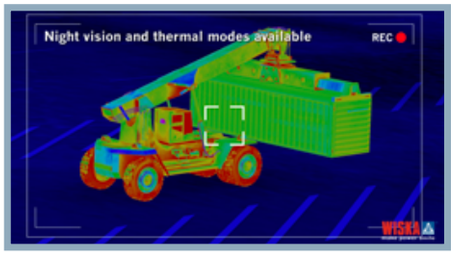


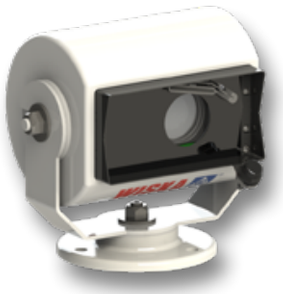
One solution

Several application options. Our new cameras can be used flexibly upright or hanging.

Variants

Available as fixed, thermal, low-temp and arctic versions.





Support and Aftercare

At WISKA we pride ourselves on offering a high level of service, support and aftercare.

Our highly skilled team of engineers and designers take you from consulting, planning, design, production, delivery and of course ongoing support.

It is what sets us apart and gives our customers added reassurance and confidence that they are dealing with the best people in the business.

Quality matters

Our products are developed and tested extensively, ensuring they **meet the highest demands under the toughest of conditions**.

These tests are conducted by our team of highly skilled designers and engineers at our state-of-the-art laboratory facilities in Germany.
